ReliaQuest: Fully chelated EDTA solutions formulated to prevent nutrient tie-up and designed for use in soil and foliar applications.

- 9% Zinc
- 6% Manganese
- 4.5% Iron
- 7.5% Copper
- 2.5% Magnesium
- 3% Calcium

ReliaQuest Crop Blends: A blend of 100% fully chelated EDTA micronutrients in the precise ratio for crop uptake and efficiency with penetration and translocation aids, as well as humectants and growth enhancement compounds for easier nutrient mobility in the plant.

- **Chelated Blend for Beans:** 2.3% Mn, 1.5% Fe, 1.15% Zn, 0.47% Cu, 0.10% B, 0.01% Mo
- **Chelated Blend for Corn:** 2.0% Fe, 1.5% Mn, 1.0% Zn, 0.40% B, 0.15% Cu
- **Chelated Blend for Cotton:** 3.8% Mn, 1.12% Zn, 0.62% B, 0.32% Cu, 0.20% Fe
- **Chelated Blend for Peanuts:** 2.6% Fe, 1.6% Mn, 0.40% Zn, 0.30% Cu, 0.06% B
- **Chelated Blend for Wheat:** 3.0% Fe, 0.61% Mn, 0.46% Zn, 0.10% Cu, 0.12% B

ReliaSol: Complexed nutrient solutions designed for soil and foliar applications to prevent and correct deficiencies in crops.

- 10% Boron
- 10% Molybdenum
- Foliar Micrunutrient Blend
- 10% Calcium
- 6% Magnesium
- Moly-B
- 8% Manganese
- 10% Zinc

Glucoheptonates: Natural sugar complexed nutrient solutions designed for soil and foliar applications in crops.

- 4% Magnesium Glucoheptonate
- 5% Iron Glucoheptonate
- 7% Zinc Glucoheptonate
- 5% Manganese Glucoheptonate
- 5% Copper Glucoheptonate

Premium MSO and Siloxane Crop Oil: A superior nonionic methylated seed oil combined with an organo-modified siloxane-based emulsifier/surfactant system that delivers exceptional penetration and spray coverage, effectively lowers the surface tension of spray solutions, and improves pesticide performance.

Nonionic Siloxane Super Wetter Surfactant: Superior nonionic surfactant providing superior wetting, spreading, and penetration of spray solutions.

Drift Control Agent (Oil Emulsion DRA): A patented oil emulsion DRA and deposition management agent that reduces fine spray droplets under 100 microns, increases the droplet volume median diameter (VMD), and promotes a more uniform droplet spectrum—enhancing spray coverage and improving on-target deposition.

Sun Protectant and Anti-Transpirant: A unique blend of long-chain fatty alcohols and ethoxylates that forms a reflective coating on leaves to reduce transpiration and lower canopy temperatures without affecting gas exchange. Its UV-absorbing properties help prevent sunscald and russetting, improving fruit color and overall crop quality.
